Public Participation:

Is the process where individuals, governmental and non-governmental groups influence decision making in policy, legislation, service delivery, oversight and development matters. It is a two-way interactive process where the duty bearer communicates information in a transparent and timely manner, engages the public in decision-making and is responsive and accountable to their needs.

Sector:

Is a composition of departments, agencies and organizations that are grouped together according to services and products they provide. They produce or offer similar or related products and services, and share common operating characteristics.

Sustainable Development:

The development that meets the needs of the present, without compromising the ability of future generations to meet their own needs.

Sector Working Group:

Is a technical working forum through which government departments and partners/stakeholders consult on sector issues and priorities.

Target:

A result to be achieved within a given time frame through application of available inputs.

FOREWORD

As we embark on the second year of the 3rd County Integrated Development Plan (CIDP) for the County premised on the "Building the Future on the Foundation We Have Laid," the County Government reflects the essence of our journey towards a more prosperous, inclusive, and sustainable Kisumu County. The County has made significant strides in recent years, positioning itself as a beacon of hope and progress within the broader Kenyan context. Our shared commitment to development has seen us overcome numerous challenges and leverage opportunities that have come our way. The strides we have taken thus far are not merely accomplishments, but rather, they serve as the building blocks upon which we will construct the future of Kisumu.

The 2024/2025 financial year is a critical juncture in our development journey. It marks the second year of our Third CIDP, a comprehensive and forward-looking roadmap that sets our course for the next five years. This plan reflects our collective vision, aspirations, and priorities, carefully designed to address the unique needs and opportunities that define Kisumu County.

Our commitment to the 10 priority areas of the 3rd CIDP (2023/2027) espoused in the Governor's manifesto continues unwaveringly. These pillars serve as our guiding principles as we strive to create an environment in which every citizen can prosper and enjoy a high quality of life. Consequently, economic development remains at the forefront of our agenda. We recognize that a vibrant and diversified economy is the cornerstone of sustainable growth. This year, we will intensify efforts to create an enabling environment for businesses to thrive, facilitate job creation, and promote entrepreneurship and innovation. Our investments in key sectors such as agriculture, trade, tourism, payment of pending bills, and technology will play a pivotal role in driving economic transformation.

Our commitment to social inclusion is resolute. We believe that development is only meaningful when it benefits every citizen, leaving no one behind. This year, we will continue to prioritize healthcare, education, and social welfare, ensuring that the most vulnerable among us receive the support they need to lead dignified lives. Similarly, environmental sustainability and climate change is a responsibility we embrace with utmost seriousness. We are committed to preserving our natural resources for future generations. In this regard, we will intensify our efforts to address climate change, promote sustainable land use, and enhance environmental conservation. Moreover, good governance and effective administration are the bedrock of our development agenda. We are dedicated to transparency, accountability, and public participation in decision-making processes. By strengthening our governance structures and improving service delivery, we aim to enhance public trust and confidence in the County Government.

In this ADP, the County Government will continue to empower county residents through implementation of the 10 areas of commitment in the 3rd CIDP.

GEORGE O. OKONGO,
CECM FINANCE AND ECONOMIC PLANNING, & ICT SERVICES

ACKNOWLEDGMENT

The Kisumu County Annual Development Plan, 2024/2025 is a result of contribution and concerted efforts of all the members of staff of the County Government. The policy document is prepared in line with the provisions of Article 220(2) of the Constitution of Kenya, 2010 and Article 126(1) of the Public Financial Management Act, 2012.

First, I acknowledge the valuable leadership and support of H.E the Governor and The Deputy Governor. I further wish to appreciate the CECM Finance and Economic Planning and ICT Services for setting off the budget cycle by providing leadership to the process. His guidance enabled the process to be completed in good time. Great thanks go to all CEC Members, the County Secretary and all the Chief Officers for their overall coordination of their departments and support throughout the plan preparation process.

In addition, I would like to acknowledge the involvement of the Public Participation Directorate and all those who took part in this important exercise of sensitizing members of the public on the County Planning framework. Consequently, the wealth of ideas generated have contributed immensely in formulation of this quality-planning document.

A core team in the Economic Planning and Budgeting directorate spent a significant amount of time consolidating this policy document. I am mostly appreciative to the directorate of Economic Planning and Budgeting for working diligently in the development of this document.

Wilson Abiero
Ag. Chief Officer Economic Planning

EXECUTIVE SUMMARY

Kisumu County Annual Development plan 2024-2025 is a policy blueprint that will guide development in the county in the 2024–2025 FY. The plan starts by providing brief background from which development programmes, projects and priorities are identified and outlines the key projects and programmes that will be implemented by County government departments and agencies during the plan period. The Blueprint is divided into five chapters as follows.

Chapter One gives the background information on the socio-economic and infrastructural status that has a bearing on the development of the County. The chapter provides description of the County in terms of the location, size, demographic profiles as well as the administrative and political units. In addition, it provides information on linkage between ADP and other planning documents as well as preparation process of the ADP.

Chapter two reviews the performance of the county in terms of implementing the 2022/2023 ADP giving the achievements, challenges, lessons learnt and strategies to mitigate the challenges. In reviewing the 2022/2023 ADP, the chapter analyses strategic capital and non-capital priorities proposed; grants, benefits and subsidies; planned versus allocated budget and key achievements.

Chapter three presents development projects, programmes and priorities to be implemented in the 2024-2025 plan period. In each sector, the chapter outlines the county sectoral composition consisting of sectors' vision, mission, and sectoral project and programme priorities. Capital and non-capital projects under the programmes are presented in a matrix form consisting of: name of project; description of activities; target; location; provisional budgetary allocation in the financial year; the key performance indicator that will be used to measure progress and the expected key output of each project. Measures to harness cross sector synergies and remedies to mitigate adverse cross-sectoral impacts of the projects where necessary are captured.

Chapter four presents a summary of the proposed budget by sector. It also provides a description of how the county government is responding to changes in the financial and economic environment. The chapter gives resource allocation criteria; proposed budget by sector and finally risks, assumptions and mitigation measures.

Lastly, chapter five discusses the county monitoring and evaluation framework. This section contains a brief description of the M&E structure in the county, Data collection, and Analysis and Reporting mechanisms.

CHAPTER ONE

1.1.4 DEMOGRAPHIC PROFILES

Population size and Composition

The population of the County according to the 2019 Kenya Population and Housing Census was 1,155, 574 persons with 560,942 (48.5 percent) males and 594,609 (51.5 percent) females. The intersex population was 23, representing 1.5% of the national total with Nyando sub-county registering the highest at 7 while Muhoroni and Nyakach had 1 each. The average household size in the county is 3.8 compared to the national average of 3.9 with Nyando and Nyakach having sizes of 4.2 each with Kisumu Central being the lowest at 3.3.

Population Density and Distribution

The County's average population density according to 2019 Kenya Population and Housing Census stands at 554 per sq. kilometre against the national average of 82 per sq. kilometre. The most densely populated Sub-County as per the 2019 Kenya Population and Housing Census is Kisumu Central at 4,737 persons per square km while Muhoroni Sub-County is the least at 234 persons per square km. By end of the plan period, it is projected that Kisumu Central Sub-County population density would be 5,168 persons per square km while Muhoroni Sub-County will grow to 239 persons per square km given an annual population growth rate of 2.2%.

Table3: Population Density and Distribution

Nyakach	326.7	160,576	492	164,148	502

Demographic dividend

The population of the County is dominated by young people who need to be supported by those in the workforce. Three quarters of the population is under 30 years old and 43.5 percent is under 15 years, characterizes the county’s population structure. This indicates that the under 15 years who are still under care of the employed population put pressure on the incomes thus leaving the working population without adequate savings for investment. The county comprises of 560,942.00 male gender and 594,609.00 female gender as shown in the figure 3 below. The county can benefit from the youthful population through investment in skillful education and training that targets entrepreneurship and job creation. Creation of meaningful job opportunities through provision of adequate investment opportunities and investment climate will translate the youthful population into a powerful workforce able positively to contribute to the county’s development.

1.2 Rationale for Preparation of ADP

The Constitution of Kenya Article 220 (2) provides for national legislations that shall outline the structure of the development plans and budgets of counties. The legislation that prescribes this structure includes the Public Finance Management Act (PFMA 2012) and the County Government Act (CGA 2012). These legislations present the basis for the preparation of the development plans, which include the Annual Development Plans in the County. These plans guide prudent resource allocation and prioritization of needs to realize the County’s development agenda. The Annual Development Plan 2024/25 is the Second annual plan for implementation of the County Integrated Development Plan 2023- 2027.

This Annual Plan has taken into consideration the priorities set out in the fourth medium-term public participation for the implementation of the Kenya Vision 2030. The Plan also provides for cascading of the plan to the annual budget, work plan, and the performance contracts signed by all County Departments and Agencies. Figure 1, presents the linkage between the Annual Development Plan and other county and national development plans and budgets.

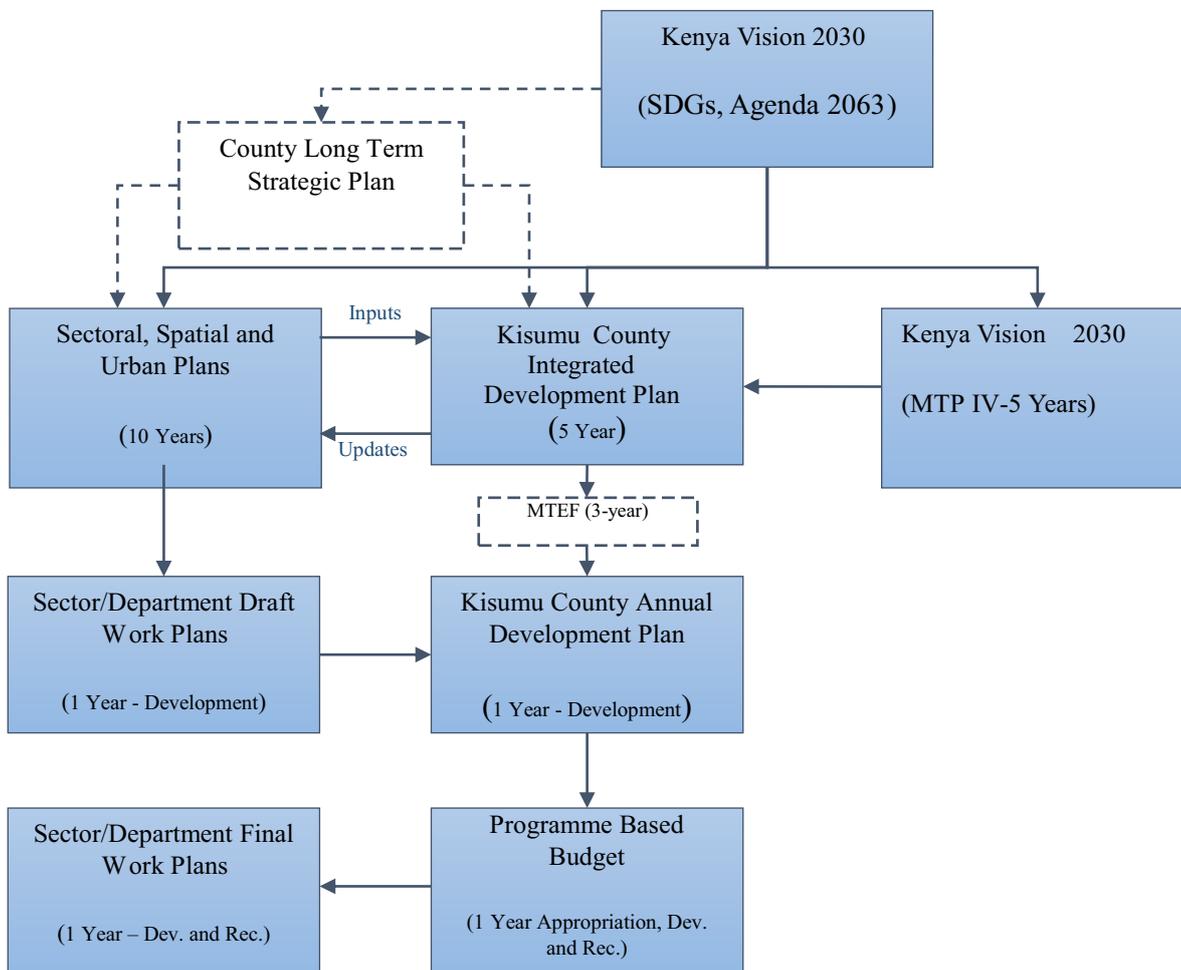

Figure 2: Annual Development Plan Linkage with CIDP III (2023-2027)

1.3 Preparation Process of the Annual Development Plan

The preparation process of 2024/2025 ADP adopted a broad-based consultative approach. The approach included departmental sector caucus discussions where technical inputs were provided for each department using departmental primary data collected during public participations. Ceiling setting for every programme was established having in mind the unique needs of each ward. The Economic Planning and Budgeting sector directorate and the departmental M&E focal point persons to form draft ADP for cabinet deliberation and approval consolidated the deliberation findings and proposals. The final approved document by cabinet was after which submitted to county assembly for their considerations in line with legal provisions.

3.6 Water, Environment, Natural Resources and Climate Change

Sector name:

Water, Environment, Climate Change and Natural Resources

Vision:

A climate resilient county with clean and healthy environment supplied with quality water and sanitation

Mission:

To enhance access to safe and healthy environment with sustainable water supply that is climate resilient through a multi-sectorial approach.

Sector Objectives

The department has set the following specific objectives towards realization of its mandate:

- To increase water coverage from 41.4% to 51.4% by 2027
- To improve access to sustainable safe water from 76% to 86 % by the year 2027
- To increase rain water harvesting from 10.3% to 20%
- To reduce non-revenue water from 47% to 40%
- To increase improved sanitation coverage, from 25% to 35% by 2027
- To strengthen climate change governance framework
- To enhance climate change adaptation and mitigation interventions
- To enhance climate change adaptation and mitigation interventions
- To enhance partnership in Research, Education, innovation and knowledge management
- To reduce risks to communities and infrastructure resulting from climate-related disasters such as droughts and floods
- To promote Green Economy strategy (GES)
- To Strengthen Solid Waste Management System in Kisumu County
- To green the county and restore degraded lands
- To Control Air, Noise and Water Pollution

Sector Strategic Priorities

Departmental priorities aligned to specific objectives are as outlined below;

- Improve access to sustainable safe water
- Development of water infrastructure
- Strengthen water governance
- Rehabilitation and augmentation of existing viable water facilities
- Exploitation of additional water sources
- Promotion of climate resilient/smart water and sanitation infrastructure.
- Strengthen Partnership

To Improve Access to Sanitation

- Development of sanitation infrastructure
- Promotion of climate resilient/smart sanitation infrastructure.
- Strengthen Partnership

To Improve Environmental conservation and Management

- Strengthen solid waste management system

- 
- Strengthen forest management and governance

	Research and innovations on climate change undertaken	No of climate change innovations supported & implemented	0	10	5,000,000
Programme Name: Climate Change					
Objective 4: To reduce risks to communities and infrastructure resulting from climate-related disasters such as droughts and floods					
Outcome 1: Improved people's ability to cope with floods, and climate proofed infrastructure					
Outcome 2: Improved early warning systems and communications					
Sub Programme	Key Outputs	Key indicators	Baseline (Current status)	Planned Targets	Resource Requirement (Kshs)
Climate Information Services	Participatory Scenario Planning (PSP) conducted	No. of PSPs carried out	3	2	2,000,000
	Radio talk shows conducted	No. of radio talk shows conducted	3	2	200,000
Early warning System	Disaster hot spots mapped	No. of maps developed	0	1	3,000,000

	A WS constructed and operational	No of automatic weather stations constructed	1	1	2,000,000
Disaster Risk Management	DRM structures strengthened	No. of DRM committees trained	2	7	500,000
Programme Name: Climate Change					
Objective 5: To promote Green Economy strategy (GES)					
Outcome: Enhance sustainable green strategies and green jobs created					
Sub Programme	Key Outputs	Key performance indicators	Baseline (Current status)	Planned Targets	Resource Requirement (Kshs)
Promotion of Green innovation and Switch Africa Green	Green innovations and technology promoted	No of innovations discovered and shared	4	50	50,000,000
	Communities in land degraded sites capacity built	Kilometer of land rehabilitated	0	10	5,000,000
	City greening and biodiversity management	No of trees planted and surviving		1,000,000	10,000,000
Programme Name Environment and Natural Resources					
Objective: To Strengthen Solid Waste Management System in Kisumu County					
Outcome: Improved Solid Waste Management System					
Sub Programme	Key Outputs	Key indicators	Baseline (Current status)	Planned Targets	Resource Requirement (Kshs)
Solid Waste Management	Regulations on and guidelines on Solid Waste Management	No. of Act / policy in place	0	1	1,000,000
	Material Recovery Facility (MRF) in suitable parcels of land at Sub - County Level	No. of waste Material Recovery Facilities	0	1	20,000,000
	Safe adequate water supply	No. Solar powered borehole at Kasese IWMPF	0	1	4,000,000
	Kasese Integrated Solid Waste Management Facility (ISWMPF) site Improved	Length in Meters of Reinforced Stone perimeter fence – Kasese lot 2	0	750	20,000,000
	Improved access to the dumpsite	Length (Km) of improved	0	5	18,000,000

	Management Plan Develop and implemented							
	County drainages and water-ways opened	Length (km)	30				20,000,000	
	Water-pans constructed and equipped	No. of Water pans	2				10,000,000	
	Urban storm-water drains desilted and lined/stone pitched and equipped with bins	Length (km)	4				12,000,000	
	Urban Beautification Done	No. of Urban centres and new town	1				5,000,000	
	Environment and Natural Resource sensitization done in different forums	No. of forums sensitizing on Environment and Natural Resources	1				2,000,000	
	Capacity and knowledge management enhancement in Water Resources Management	No. of staff Capacity Enhancement	5				1,000,000	
		No. of Joint Interventions	1				3,000,000	
Programme Name Environment and Natural Resources								
Objective One: To Control Air, Noise and Water Pollution								
Outcome One: Safeguarded Environment for Sustainable Development								
Sub Programme	Key Outputs	Key per formance indicators	Baseline (current status)	Planned Targets	Resource Requirement (Kshs)			
Pollution Control	Safeguarded environment from social and environmental impacts associated with development projects	No. of Projects reviewed to conform with best Environment Practices		1	50,000,000			
	Air-Pollution monitoring and enforcement strengthened	No. of air monitoring and enforcement		2	1,000,000			
	Noise and Excessive Vibration Controlled	No. of improvement orders		10	500,000			
	Strengthened Water Pollution Control	No. of water pollution control initiatives		2	5,000,000			
				1	2,000,000			

Programme Name: Water Services Provision						
Objective 1: To improve access to sustainable safe water from 76% to 86 % by the year 2027						
Outcome: Improved access to safe water						
Sub Programme	Key Outputs	Key indicators	performance	Baseline (Current status)	Planned Targets	Resource Requirement (Kshs)
Water infrastructure development	Boreholes drilled and operationalized	No. of boreholes drilled and operationalized			40	180,000,000
	springs protected and operationalized	No of springs protected and operationalized			20	160,000,000
	Construction of New water supply systems	No of new water supply systems constructed			1	4,000,000,000
	Water supply systems upgraded and operationalized	No of water supply systems upgraded			3	645,000,000
	Non-functional water supply systems rehabilitated and operationalized	No. of non-functional water facilities rehabilitated			50	150,000,000
Water quality management	Water quality laboratories constructed and equipped	No of water quality laboratories constructed			3	150,000,000
Programme Name : Water Services Provision						
Objective 2: To Increase Rain Water Harvesting From 10.3% To 20%						
Outcome: Increased Rain Water Harvesting Systems						
Sub Programme	Key Outputs	Key Indicators	Performance	Baseline (Current Status)	Planned Targets	Resource Requirement (Kshs)
County's water storage capacity improved	Water reservoirs constructed and operationalized	Capacity of water reservoirs constructed (m3)			2881	46,000,000
	Rainwater harvesting promoted	No of HH and institutions with rainwater harvesting systems			120	8,000,000
Programme Name: Water Services Provision						
Objective 3 : To Increase Water Coverage From 41.4% To 51.4% By 2027						
Outcome: Increased Water Coverage						
Sub Programme	Key Outputs	Key indicators	performance	Baseline (current status)	Planned Targets	Resource Requirement (Kshs)

Pipeline network extension	New Pipeline networks laid and operationalized	Km of pipeline laid	261.36	87,120,000	
	Dilapidated pipeline network rehabilitated and operationalized	KM of pipeline network rehabilitated	63	56,000,000	
	Households connected with Water	No of households connected in Rural	783	337,500,000	
		No of Households connected in Urban	645.7	102,700,000	
Programme Name : Water Services Provision					
Objective 4 : To Reduce Non- Revenue Water From 47% To 40%					
Outcome: Reduced Non - Revenue Water					
Sub Programme	Key Outputs	Key indicators	Baseline (current status)	Planned Targets	Resource Requirement (Kshs)
Management of Non-Revenue Water	NRW management unit Established	No of NRW management units established		1	1,000,000
	GIS Mapping for all 14gazetted water supplies undertaken	No of GIS maps		71	4,000,000
	Meters installed	No of meters installed		15000	168,800,000
	Appropriate technologies on management of NRW Adopted	No of technologies adopted		2	10,000,000

Cross-Sectoral Impacts

3.13 Kisumu County Public Service Board

Sector Overview

County Public Service Board

Kisumu County Public Service Board (CPSB) is an independent institution established under Article 235(1) of the Kenyan constitution. The CPSB is charged with the responsibility of developing and implementing human resource policies and framework for the County government in line with the relevant laws. The CPSB handles all human resource issues in the County and consists of a Chairperson and other members nominated by the Governor and approved by the County Assembly. The secretary to the board is a Certified Public Secretary (CPS K) nominated by the governor and approved by the County Assembly.

The board has the responsibility of ensuring that the County Public Service has adequate skilled and competent personnel; its functions include establishment and abolition of offices and appointing persons to act or hold office in the public service and in the boards of cities. It also plays a disciplinary role in the Public Service as well as reporting to the County Assembly with regards to the public service.

Vision

“A responsive and performance driven County Public Service Board”.

Mission

“To attract, retain, and transform County Public Service for improved service delivery”.

Sector composition:

- County Public Service Board Members
- Board Secretariat headed by the Secretary of the Board.

Strategic Priorities

The Sector Strategic Priorities are enhancing institutional capacity of the Board, enhancing Board performance, values and principles of public service and partnership and networking.

CHAPTER FOUR

RESOURCE REQUIREMENT

4.0 Introduction

This section indicates the criteria used to allocate resources per sector/sub-sector and across different Sub-counties and wards in the County. It also gives a description of the financial and economic environment and the trend in growth in equitable share, trends in revenue collection, estimated and actual revenue and the link between the budget and the planning process. In Conclusion, the chapter highlights probable risks to be experienced during implementation, corresponding assumptions and mitigation measures.

4.1 Resource Allocation Criteria

The County Government of Kisumu will in the next plan period share resources per programme across all sectors. The resources shall be allocated based on:

- Provision for discretionary and non-discretionary expenditures such as Personnel Emoluments and the accompanying benefits and allowances;
- County Development Priorities drawn from CIDP/Governor’s Manifesto and public inputs during ADP public participation forums conducted as from 16th to 24th August, 2023.
- Based on fiscal responsibility principles as espoused in Section 107 of the PFMA, 2012 that resources allocated to development expenditure should be at least 30 percent and that total recurrent expenditure should not exceed the total revenue anticipated.

4.2 Proposed Budget by Sector

The proposed total budget (expenditure) for the ADP 2024-2025 is Kshs. 11,598.96 million against a projected revenue of Kshs. 14,702,185,248 leaving a surplus of Kshs. 3,103.23 million

Table4: Sectoral resource requirements

TOTAL	11,598.96	100.0

4.3 Financial and Economic Environment

It is anticipated that a positive macroeconomic environment will continue during the implementation of the ADP 2024-2025. The County will proactively establish strategies to address potential hurdles, including insufficient funding for capital projects and unmet OSR (Own Source Revenue) targets. The County will derive revenue from two primary sources: The County's National share, encompassing equitable shares according to the Commission on Revenue Allocation (CRA), as well as other conditional loans and grants; and the County's own source revenue, which consists of locally collected income, categorized into main revenue streams and departmental collections.

Similarly, in accordance with Article 110 (c) of the 2010 Kenyan Constitution, the County will draft a Finance Bill to support the generation of local revenues. An assessment of the fees and taxes in place, along with the potential adoption of a Valuation Roll, will be explored to broaden the revenue sources and enhance the available resources.

County's Share of the National Revenue

The County's share of the National Revenue comprises of the Equitable Share and Conditional and Grants. The County Government of Kisumu's equitable Share has been on a steady increase and quite predictable ranging from Kshs 4,185,810,118 in 2013/14 to Kshs 6,908,000,000 in 2018/19 Financial Years. However, the FY 2019/20 witnessed a decline in Equitable Share to Kshs 6,836,400,000 as per the County Allocation of Revenue Act, 2019. Other conditional loans and grants have also been quite predictable except for conditional allocations for other loans and grants and the conditional allocation. The 2023/24 FY County's equitable share is projected to be Kshs. 8,361,797,770 and estimated to rise Kshs 9,030,741,592 in the FY 2024/2025.

County's Own Source Revenue

The County's own share has been pro-rated into two categories of revenue streams namely: Main revenue streams and revenue from departments. The budget estimates for the County's own share of collected revenue has varied over the years from Kshs. 3,417,121,255 in 2013/14 to 1,500,000,000 in 2014/15 to Kshs. 1,868,587,022 in 2015/16, Kshs. 1,584,987,119 in 2016/17, Kshs. 1,148,685,296 in 2017/2018, Kshs. 1,382,567,120 in 2018/2019, and is projected at Kshs. 2,465,472,270 in 2024/2025.

Table5: Trend in Equitable share and Gross Revenue

CHAPTER FIVE

KISUMU COUNTY MONITORING AND EVALUATION SYSTEM

5.0 Introduction

This section provides an overview of the Kisumu County Monitoring and Evaluation Framework. Monitoring and Evaluation forms part of a results culture in the public service that is meant to provide value and services for all citizenry. In the planning and implementation of development efforts, Monitoring and Evaluation ensures that intended targets are achieved, remedies taken when projects are off-track, and lessons learnt used to promote efficiency and effectiveness.

An effective Monitoring and Evaluation is critical to successful implementation and achievement of development results for any plan, policy, programme and/or project. A robust M&E system is essential for efficient and effective implementation of the CIDP, the Annual Work Plan and individual work plans. County Integrated Development Plans, and Departmental Strategic Plans, Annual work plans can only have value when there is prudent tracking and review of the same.

M&E committees so form at all implementation levels will help identify and keep track of indicators at all reporting levels, establish compliance with reporting standards and ensure consistency of indicators with reporting formats established and/or developed.

Utilization of the various M&E reports will provide timely and reliable feedback to the budgetary and policy preparation processes. They will also provide regular, timely and reliable reporting on the effectiveness of government programmes and projects to the government itself, development partners and the wider stakeholder groups.

5.1 Modalities and Guiding Principles of The County M&E System

All players mainstream Monitoring and Evaluation into all development programmes and projects across the County. For accountability purposes, the government disseminates adequate information on development policies, programmes and projects, and information regarding financial and other resources allocated to the same. The system builds on transparency and ownership-providing citizens with the opportunity to participate in the different stages of M&E activities. Data collection, storage, analysis, report writing and utilization of results take place using standardized guidelines and formats. It is envisaged that M&E process is guided by the principles of systematic inquiry, integrity and honesty, ensuring accurate, timely and reliable reporting of findings. Lastly, the results and lessons learnt is disseminated to policy-makers, beneficiaries and other stakeholders and the general public in order to serve their information needs and foster a results culture.

5.2 Institutional Arrangement for Kisumu County M&E System

The Governor as the chief executive through the Special Delivery Unit will be the key champion for the County's move to focusing on results. Among the key functions and responsibilities for the County Governor provided for in the Constitution is submission of annual report on the implementation status of the County policies and integrated development plan to the County Assembly and promotion of the competitiveness of the county in the National, Regional and International platform. These functions are expected to make M&E reports a permanent feature in the Governor's meetings.

The Special Delivery Unit (SDU) is currently working towards establishing an institutional M&E structure by developing a Countywide Monitoring and Evaluation Framework, and Monitoring and Evaluation Policy, which will be all inclusive. Stakeholders of the County

M&E System are and not limited to; County government departments and Units, the National Government departments, the Donor Agencies, the Private Sector Organizations, CBOs, CSOs, FBOs, and the general citizenry.

The Monitoring and Evaluation framework will shore case data collection, collation and analysis structures, from the County's lowest geographical level to the County Headquarters. It will stipulate responsibilities and benefits within the structure. The County Monitoring and Evaluation System, which will be developed and adopted by regulations as passed by the Kisumu County Assembly, will support the county M&E framework.

The County Monitoring and Evaluation Guidelines proposed and adopted by the CoG and the National Government proposes the establishment of County Monitoring and Evaluation Committee (CoMEC), Sectoral Monitoring and Evaluation Committee (SeMEC), Sub-County M&E Committees (SCoMEC), among other committees to help in actualization of county M&E functions. The various institutions/departments within the County will form M&E units to be represented in the various committees. At the lower level, there will be Sub-County M&E Committees (SCoMEC) that will be required to follow up on the development progress at their level up to the village level, carry out routine monitoring, collect and collate data and prepare progress reports that will be submitted to the CoMEC on a quarterly basis.

By and large, the Kisumu County Monitoring and Evaluation Directorate will be the Secretariat of the County M&E Functions, with departments represented through M&E Focal Persons (departmental nominees), who will form a strong partnership in ensuring proper management of M&E functions. The M&E Focal Persons will work in liaison with the Director, Monitoring and Evaluation in matters M&E. The focal persons will be required to collect M&E data from their various departments on a monthly basis and submit the same to form the M&E Quarterly reports from their departments, leading to County Quarterly reports. The County Quarterly reports shall be collated to inform the Annual M&E reports. The County M&E Reports will include programs and projects carried out by both the National and County governments, and form greater data to be used in the "State of the County Address" by the Governor at the County Assembly and the "State of the Nation" address by the President.

5.3 The Kisumu County M&E Directorate

The Monitoring and Evaluation Directorate is domiciled in the Special Delivery Unit (SDU), under the Department of Governance and Administration. The Directorate is charged with the responsibility of; supporting the development and reviewing of the M&E Policy; supporting departments in the development of M&E tools for "Development Results"; supporting departments in developing Sector Specific Standard M&E reports; providing technical field support to the M&E Units and committees; supporting development of Sector Specific Performance Indicators; supporting the development of County Specific M&E Framework, among others.

Proposed Kisumu County Integrated M&E Structure

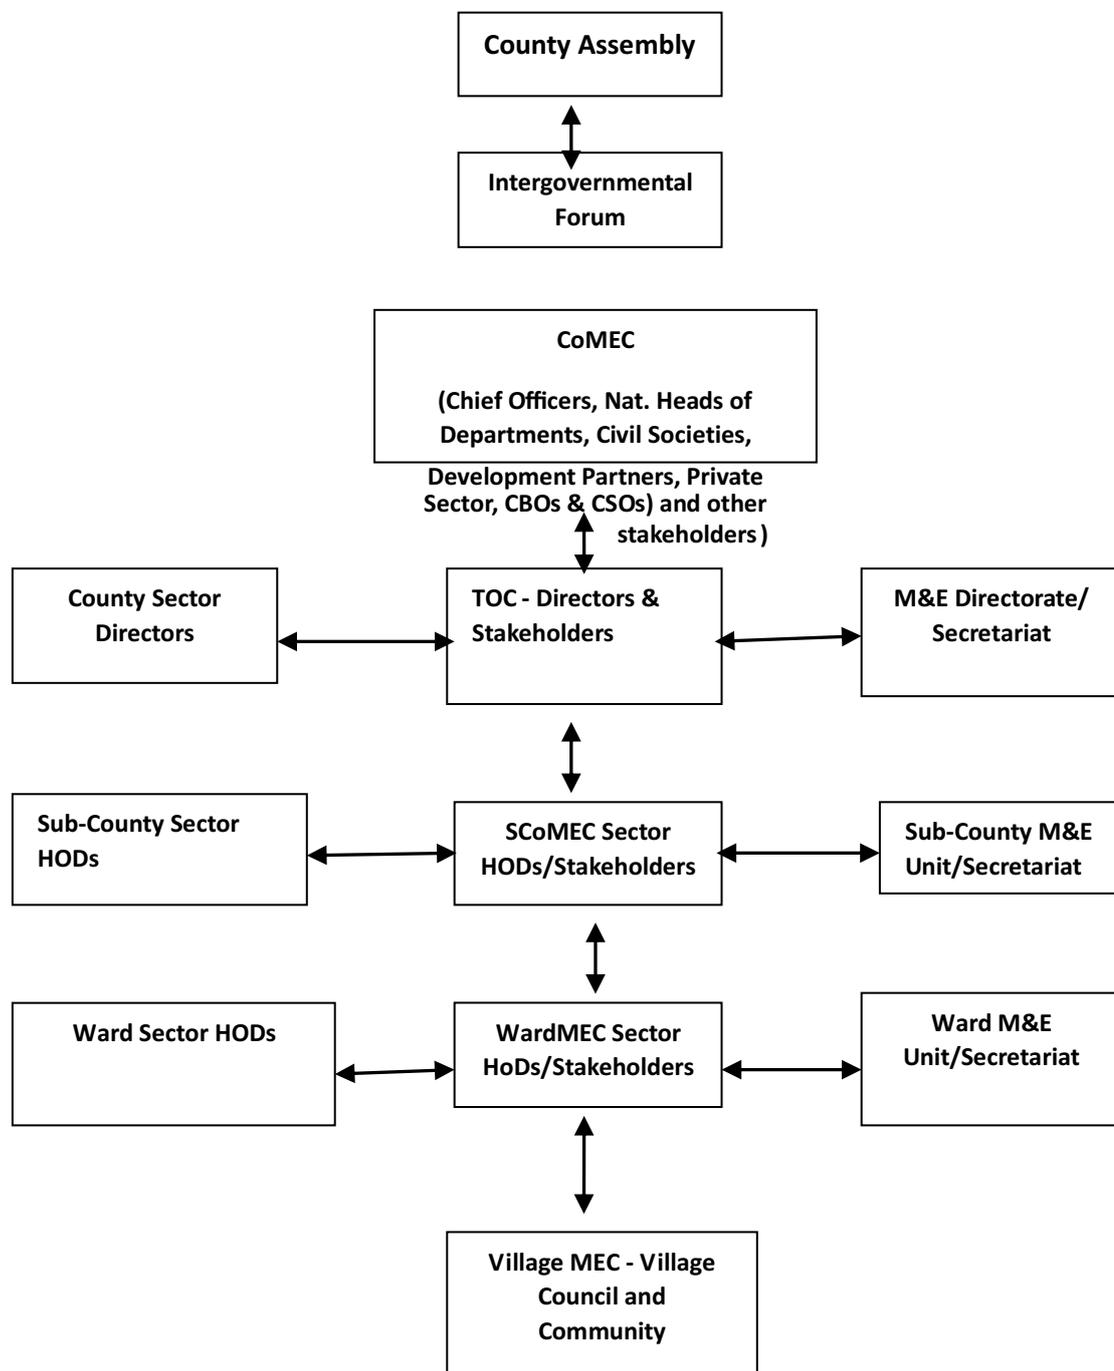

Figure 3: Proposed Kisumu County Integrated M&E Structure

5.4 Citizenry Role in the M&E System

The citizens have Constitutional rights to be supplied with information. Consultation and dialogue with the public is the responsibility of all actors and specifically important for service delivery institutions to consult with their stakeholders. Citizens will therefore be involved in the design (through public participation), implementation and use of findings of M&E activities through active participation and provision of useful data and/or information about policies, programs and projects carried out by different Agencies.

5.5 Data Collection, Analysis, and Reporting For the M&E System

The County M&E Directorate will collaborate with other departments and Sector Working Groups in formulating indicators for tracking performance, develop data collection tools, conduct data collection and analysis. The M&E Directorate will coordinate training and/or capacity building in matters M&E, especially to Departmental M&E technical leads (Focal Persons) from other departments, to support in data collection, analysis and reporting. Data will be collected regularly (Monthly) and reports generated (Quarterly) and disseminated on a quarterly basis. This Data will inform the County Annual Budget Review and Outlook Paper (CBROP), County Annual Progress Report (CAPR) and the County Annual M&E report (CAMER).

The County will strive to develop Kisumu County M&E Policy, Kisumu County M&E Framework, establish M&E Committees at various administrative levels, set up computerized M&E platform to make M&E processes real time, reliable and transparent. It is envisaged that such system will lead to efficiency and effectiveness in data collection, collation, analysis and reporting.

To operationalize M&E in the county, all county departments and Units will use a Universalised Reporting Template that shows structured analytical thinking, moving from; Objective – Input – Activity – Output – Outcome –Impact, of their programs/projects as presented in table 32 below.
